

Cisco ACE Migration to Citrix NetScaler

Spico Solutions Expert ACE-to-NetScaler Migration

Cisco announced in 2010 that it would end-of life the ACE platform, yet due to the complexity and critical nature of the Application Delivery Controller (ADC), many Cisco ACE users have continued to support ACE as a key component of their networking infrastructure. At this time however, remaining Cisco ACE deployments represent a risk because the end-of-life product is now also End of Support. Since the time Cisco announced it would discontinue the ACE product line, Cisco has been recommending Citrix Systems NetScaler ADC to replace Cisco ACE. Cisco's relationship with Citrix has gone well beyond a simple recommendation, as Cisco has been working with Citrix to develop NetScaler integration and migration tools. Cisco also provides guidance as to which NetScaler models are most effective replacement for existing ACE models.

Spico Solutions, one of only a few Citrix partners in the world to be certified with the prestigious Citrix Networking Specialist Partner accreditation, offers the most qualified resources to assist in your ACE platform migration and enable a seamless deployment of NetScaler ADCs in your environment. With over a decade of load balancing expertise, Spico Solutions is able to provides skillful and deeply competent assistance during all phases of the transition, freeing up technical resources for other business critical tasks. See the checklist below highlighting the critical aspects of the migration.

Migration Checklist

- ✓ Assessment of current ACE deployment
- ✓ Conversion of ACE configuration to NetScaler
- ✓ Fully migrate ACE context
- ✓ Support live VIP migration
- ✓ Knowledge transfer/education
- ✓ Application delivery improvement harnessing NetScaler capabilities
 - For Example:
 - Mobile optimized SSL
 - Content Caching plus compression
 - Mobile TCP optimization

Pricing

\$15,000 *Plus Travel and Expenses if engineer is required on-site
