# Netscaler Health Check – Ensure optimal Application Delivery

Get the most out of your Citrix NetScaler

Netscaler can improve apps and cloud-based services to run five times better. Combined with Splunk's powerful visualizations, you can get real-time views on the state of key application performance and availability metrics.

Spico Solutions, an accredited service provider for both Citrix and Splunk technology, can help you gain a comprehensive perspective of your Netscaler environment in as fast as one business day. Our in-house Splunk and Citrix expertise is combined to offer you a quick start program designed to onboard your Citrix data into Splunk, optimize it, and then deliver several high value visuals and alerts to help you monitor the performance of your Netscalers and their surrounding infrastructure.

Benefits and Deliverables

• Identify bottlenecks in user experience for online transactions

• Detect transaction time SLA violations proactively to prevent large scale issues from impacting users

• Identifying whether performance issues are client side or server side

• Optimization of Splunk environment to best incorporate Netscaler data

• Creation of multiple visuals(dashboards and/or alerts) to provide operation intelligence

• 1 day service is delivered remotely or onsite* by a highly trained engineer

Pricing

$1000 *Plus Travel and Expenses if engineer is required on-site
