

## Palo Alto Networks + Splunk Data Platform

Next Generation Firewall protection with Data Driven Security and Response.

Spico Solutions is both a Splunk and Palo Alto Networks partner. With many security use cases deployed, Spico has become a lead partner in delivering Palo Alto configuration and services with Splunk as the data ingestion engine. The End result is a positive security posture and automated response when indicators arise. Quarantine and Remediation actions are streamlined for SoC analysis via Playbook and API automation.

### Splunk – Palo Alto Networks Benefits of Integration

- Correlation of Firewall data with other security sources
- Adaptive Response and Phantom Playbook automation
- Detonating possible Malware files in Wildfire completely automated
- TRAP, AutoFocus, Dynamic Address Groups, and UserID Integration
- Splunk Phantom Playbook Automation

Spico Solutions is a Splunk Trusted Enterprise Security Provider, and Elite Level Partner.
